Small Office Solutions for DATA's Low Impact Users Group

Effective Date July 1, 2012 through June 30, 2014

No matter how small your office or network needs may be, services are available at \$25 per month through NIUNet to Low Impact Users connected to the DATA network! Our Small Office Solutions are perfect for DATA's Low Impact Users Group, including small municipalities, libraries, rural fire departments and township services. **Small offices or casual users (with 1-5 PCs)** can enjoy the same robust Internet services offered throughout the DATA network for just \$25 per month.

We offer a 100Mb link to the Internet shared among all users electing to use this service. Users will be allowed to burst up to 100Mb if the bandwidth is available. The intent is to provide a robust environment for low impact users of the Internet. Service excludes higher capacity usages such as servers that provide Pooled Commodity users with a robust environment to access the Internet.

Pooled Commodity Internet Services (for DATA grant-connected users)

Description	Monthly
Pooled Commodity Internet Services for low impact users one IP address allocation	\$25.00
Additional IP address assignment for pooled services	\$5.00

The service includes:

- Connection with up to 1-gigabit speeds to the DATA cloud services that interconnect similar facilities (i.e. Library Network, Municipal Network, Education Network etc.)
- Connection to the pooled commodity network at the rate of speed provided by transport provider.
- One IP address assignment. The user may elect to provide firewall or small connection box with Network Address Translation Protocols; DATA provides a router as part of their system.
- Next business day support.
