

DeKalb County Small Business Initiative

As part of our economic development mission, DeKalb County Government has furnished a comprehensive, step-by-step web resource for aspiring small business owners and prospective entrepreneurs in our jurisdiction. Included are links to relevant resources such as demographic data, economic information, and business workshop announcements from the DeKalb County Economic Development Corporation, sample business plans from the local Small Business Development Centers, and helpful links from other government and nonprofit agencies such as SCORE and the U.S. Small Business Administration.

Oftentimes, an individual who wishes to start a business lacks a consolidated source of information in seeking the fruition of their creative business ideas.

Thankfully, there is no shortage of available free or low cost services available to the aspiring entrepreneur in creating a comprehensive business plan and course of action that can satisfy their respective informational needs. These services range from simple information services, to educational programming, to free one-on-one consulting. It is in this vein that we have decided to create a comprehensive source of available information and resources, in hopes of turning your small business vision into a working reality!
